unqork

Expedite Business Licensing & Permitting

Seamless and intuitive experience for applicants and regulators reduces time to issuance.

Unqork, a ground-breaking, fully no-code software company backed by Google, enables governments to **virtualize and streamline business licensing and permitting processes across departments** — to significantly reduce time to issuance and eliminate the need for in-person service.

Unqork's permitting and licensing tools enable local governments to effectively support business growth. They provide applicants an **accessible, easy-to-use process that can be completed on a mobile device** and offer regulators and supervisors predictable, organized workflows with smart tools to maximize their efforts and prioritize resources.

Central to this tool is **Unqork's unparalleled ability to integrate with disparate legacy computing systems**, which breaks down silos and enables interoperability across agencies and functions.
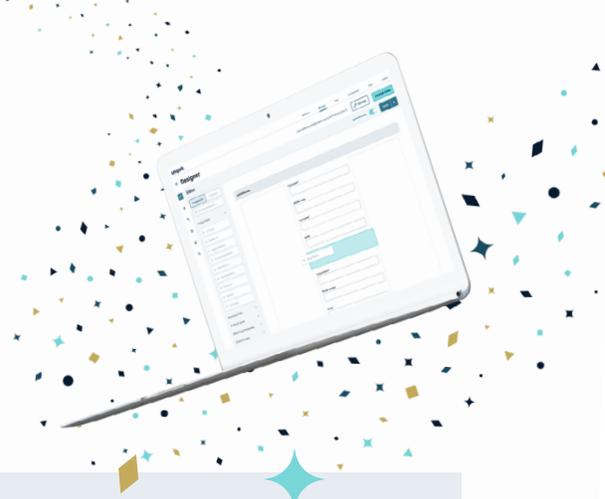

KEY ELEMENTS

- **Applicant questionnaire:** quickly determines all city, state and other licensing requirements by answering a brief series of relevant questions.

- **System Integrations:** automatically aggregates and pre-populates required documents with data from applicant questionnaire, existing licenses or other public sources.

- **Role-based controls:** facilitates rapid and multi-level agency review.

- **Virtual meeting & scheduling:** offers meeting calendaring and remote access for applicants and reviewers as required.

- **Data and security protocols:** ensure authorized access to information and protect sensitive data.

- **Performance dashboard & automated emails:** alert applicants and reviewers of status updates, missing items and deadlines to enable effective oversight.

About Unqork

Unqork is a no-code application platform that helps large enterprises build complex custom software faster, with higher quality, and lower costs than conventional approaches. Unqork's platform is deployed within large enterprises, government agencies, and hospitals with complex needs including Goldman Sachs, Liberty Mutual, Nationwide and the Cities of New York and Washington D.C. Unqork empowers IT teams to rapidly scale complex applications that require integrations with legacy systems, leverage role-based controls to manage multi-agency/jurisdictional issues, provide full auditability, meet the strictest security protocols, and can be used by millions of users.
