unqork

Healthcare
Unqork for Providers

The Challenge

Facing an evolving regulatory environment, continued consolidation, and changing patient expectations, healthcare providers must adapt to the shifting care delivery landscape. Meeting these challenges, however, often means large capital expenditures, lengthy implementation cycles, or vendor point solutions that aren't well-tailored to the needs of individual providers.

The Solution

Unqork is an enterprise no-code platform that has changed the way software is created at many of the world's most complex organizations. Building sophisticated business processes and integrating with legacy systems is now a completely visual configuration exercise.

For providers, Unqork's platform seamlessly integrates with existing and legacy systems and makes it easy to optimize clinical processes, surface critical data, and digitize the end-to-end care experience for patients.
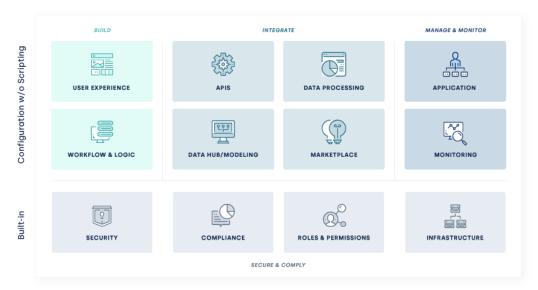

Key Benefits

- Accelerated time-to-market in weeks, not months or years

- Applications built and tailored for your business needs capturing your precise requirements

- Deep expertise deploying applications within the world's most technically complex and regulated environments

Example Provider Solutions

Clinical Decision Support	Create digital workflows with business logic to trigger patient and provider actions, reviews and alerts supported by evidence-based clinical guidance and knowledge.
Patient Portal	Deploy a digital front door for your organization, integrating legacy systems and existing clinical and business workflows, to better engage patients in your care.
Scheduling and Registration	Coordinate provider search and scheduling with database integration, elastic search, and natural-language processing (NLP).
Claims Management	Automate business logic and workflows to identify, correct and validate claims to quickly and flexibly scale adjudication and adapt to new regulations and reimbursement rules.

Everything you need to build enterprise quality applications without having to write a single line of code.

CUSTOMER STORY

With Unqork, a large urban hospital modernized provider search and patient registration tools

A large urban hospital wanted a solution to decrease patient wait times and improve patient satisfaction with the process of finding a physician, booking an appointment, and registering for a visit. They also wanted to reduce claims denials from improperly-completed paperwork and improve the ability of patients to access their medical record data.

Their client team collaborated with Unqork to develop a digital front door for patients to support physician lookup, appointment booking, calendar integration, visit registration, and medical record access, digitizing the entire experience for patients in a mobile-responsive solution.

- **Speed to deployment** was substantially improved vs. legacy approaches.

- **Digitized patient registrations** and simplified real-time integrations with EMR systems.

- **Decreased cost** of operations and ownership vs legacy systems.

- **Decreased risk** of claims denials and increased data cleanliness.

About Unqork

Unqork is the industry pioneer no-code enterprise application platform that helps large companies build, deploy, and manage complex applications without writing a single line of code. Organizations like Goldman Sachs, Liberty Mutual, the Cities of New York and Washington, DC and Maimonides Medical Center are using Unqork's drag-and-drop interface to build enterprise applications faster, with higher quality, and lower costs than conventional approaches.
