

Unqork Rent Relief

A comprehensive end-to-end solution to help state and local agencies effectively manage federal aid for rental housing assistance from The CARES Act and the American Rescue Plan.

The past 12 months have been a tumultuous time for many Americans, particularly those who were already at risk before the pandemic. The virus may be on its way out, but the effects will be felt in communities around the country for years to come.

To mitigate the impact of the past year, the federal government passed the \$1.9 trillion **American Rescue Plan (ARP)**, including \$498 billion in federal funds to state, local, and tribal governments.

\$30 billion of these funds are focused on housing and utility assistance, of which \$20 billion are allocated for rental assistance, \$5 billion for homeless assistance, and \$5 billion for Low Income Home Energy Assistance Program (LIHEAP).

Unqork Rent Relief is a comprehensive, end-to-end solution to help state and local agencies manage the newly available funds. Released initially following the passing of The CARES Act, the solution is already being used by several state & local agencies around the country to meet the scope and requirements of the ARP.

Unqork Rent Relief empowers public agencies to effectively manage and distribute these funds at scale in compliance with all federal requirements. It enables agencies to orchestrate automated end-to-end workflows from pre-screening to award determination and close out. Unqork Rent Relief includes the ability to integrate with local databases and configure digital experiences for all relevant stakeholders (renters, landlords, administrators, as well as housing specialists and program auditors). Since it's built with Unqork's enterprise no-code platform, the application can be rapidly tailored to meet local requirements and circumstances—all without writing a single line of code.

Key Elements

- ✓ **Tailored digital portals** for all relevant stakeholders including renters, landlords, program administrators, and auditors
- ✓ **Seamless integrations** with existing databases and systems, as well as third-party applications for identity validation, payment processing, and other services
- ✓ **Automated validations** to prevent fraud and duplication of benefits
- ✓ **Advanced workflow orchestration** to maximize efficiency for renters, landlords, and program administrators
- ✓ **Robust document management** and retention
- ✓ **Enterprise-grade security standards for protecting sensitive data**
- ✓ **No-code flexibility** to accommodate federal and local requirements, as well as future changes to the program (e.g., extensions, eligibility adjustments, additional funding, etc.)
- ✓ **Full auditability** including detailed digital trails
- ✓ **Enhanced operational visibility** including KPIs, reporting, and analytics

Unqork and the No-Code Revolution

No-code is a new class of cloud-based development platform that empowers organizations to rapidly build robust enterprise-grade software without writing a single line of code. Advanced no-code platforms such as Unqork come “out-of-the-box” (or out-of-the-virtual-SaaS-box) with all the toolsets and elements necessary to build and manage a robust application (e.g., front-end UX, workflow, rules engine, analytics, integrations, and maintenance). Since they’re all components of the same unified platform, everything works together in instant harmony. With no-code, organizations can devote all their development resources to addressing business challenges instead of technical ones.

Also, by eliminating the need to write code from the building process, no-code expands the scope of who is doing the development. In a no-code platform, users (or **‘Creators’** as we refer to them at Unqork) build applications by drag-and-dropping configurable elements representing both user-facing features and back-end application logic. While modern programming languages (Java, Python, etc.) can take a year to learn and a decade to master, no-code can be picked up in **just a few weeks**, making development more collaborative and recruiting more flexible.

Unqork: the World's First Enterprise No-Code Application Platform

Unqork is specifically designed to address the challenges of the world’s most complex and regulated service environments, including **financial services, insurance, healthcare, and government**. We levy decades of industry-specific experience from our in-house experts to take on each sector’s most critical challenges.

Unqork has backing from some of the world’s most disciplined investors, including Goldman Sachs, Capital G, and BlackRock. Our technologies have been adopted by leading organizations, including Liberty Mutual, Marsh, Pacific Life, Goldman Sachs, and the city of New York, just to name a notable few.

Our clients can achieve unparalleled speed and flexibility in their development function while requiring a fraction of the resources. We can deliver these benefits through:

A Unified SaaS Platform

Unqork boasts dozens of components and capabilities related to **compliance** (up-to-date rules engines for FATCA, UK CDOT, Dodd-Frank, and more), **security** (native encryption, RBAC, and crowd-sourced penetration tests), and **application management** (SDLC governance, historic versioning, and module management).

A Visual UI

Applications are built via an intuitive, visual User Interface (UI) featuring drag-and-drop components representing user-facing elements, backend processes, data transformations, third-party integrations, and a growing library of industry-specific templates.

Enterprise-Grade Standards

Unqork comes with enterprise-ready compliance (e.g., SOC2, GDPR, Privacy Shield compliant, etc.). We have complete security capabilities, including proprietary RBAC solutions, and we provide BCP and DR support for applications built on our platform.
