Banking Operations Control Solution

Build a flexible automation platform for all of your operational needs.

Many banks' operations controls are outdated and overly reliant on resource-intensive manual processes. As various departments operate in technological and operational silos with little standardization between them, it is difficult, if not impossible, for business leaders to effectively manage workflows. As tasks flow from person to person, typically via email, data quality can suffer from things as avoidable as "cut-and-paste" errors.

Digital technologies can automate and optimize these internal processes, but it would be difficult, expensive, and time-consuming to build and manage using a traditional code-based approach. This is where Unqork's ability to accelerate the development of robust enterprise-ready finance solutions can be a game-changer.

Unqork's **Banking Operations Control Solution** allows operations teams to automate and digitize their internal controls from covenant monitoring and annual reviews to exceptions management and everyday operations.

Key Benefits

- **Increased productivity:** Inject new operational efficiencies by streamlining workflows across departments

- **Greater transparency**: Effectively manage workflows by making it easy to see task status and ownership

- **Reduced transaction costs**: Avoid unnecessary tasks or back-and-forths by improving your operational workflows

- **Enhanced employee experience**: Build a more organized process for your employees to thrive in

- **Improved data hygiene**: Remove the need for manual data entry by syncing data between systems

- **More flexibility**: Digitize your operations to support your business flexibility, agility, and resiliency

- **Rock-solid compliance**: Stay compliant with current and future regulations by operating in an auditable system which validates data as you work

Key Capabilities

Seamless Integrations
Integrate with existing internal systems, as well as third-party data service providers to track tasks and validate data at every step of your workflow

Customization
Create custom workflows based on each one of your unique processes

Dashboards and Notifications
Streamline your processes with in-app notifications, email or text alerts, and dashboards to track your most important KPIs

No-Code Flexibility
Unqork's no-code platform makes changing workflows based on evolving operational needs a visual configuration exercise

SUCCESS STORY

A Large Financial Services Institution Automated Several Core Processes in a Matter of Weeks

A global financial services institution desperately needed to transform their existing project management processes. It sought to quickly develop a scalable solution that could seamlessly integrate with its existing legacy systems and provide tailored experiences for specific roles, organizations, and workflows.

By leveraging Unqork's Operations Control Solution, the institution was able to digitize and automate several core processes within weeks of ideation. This allowed them to validate data, centralize information, and work more efficiently.

About Unqork

Unqork is the industry pioneer no-code enterprise application platform that helps large companies build, deploy, and manage complex applications without writing a single line of code. Organizations like Goldman Sachs, Liberty Mutual, the Cities of New York and Washington, DC and Maimonides Medical Center are using Unqork's drag-and-drop interface to build enterprise applications faster, with higher quality, and lower costs than conventional approaches.
