

The Unqork logo is displayed in a white, lowercase, sans-serif font against a dark blue background. The background features a blurred image of a person's profile looking at several computer monitors displaying data dashboards with various charts and graphs.

Unqork Human Capital Management

Modernizing Human Capital Case Management with Unqork

Human Capital Management programs like EEO compliance and employee onboarding can be arduous and manual for Federal agencies without the right tools in place. HCM solutions available today are not specially designed for the government, are often too expensive, and do not meet any unique requirements. Unqork's HCM solutions prioritize flexibility with a cost-effective approach to help Federal employees increase their productivity and satisfaction.

Most Federal agencies are facing increased pressure to modernize their organizations by leveraging new technologies to achieve agency goals. Working across numerous industries with clients like Health & Human Services and Liberty Mutual, Unqork partners with organizations to enable this transformation.

Unqork's Human Capital Management solutions automate manual processes, improve collaboration among stakeholders, and increase overall flexibility.

Key Benefits

Simplified legacy integrations

Many agencies currently rely on legacy systems and spreadsheets as the primary technology for their EEO program. Unqork acts as digital glue by connecting current systems of record through a modern orchestration platform

Optimized workflow orchestration

Maximize stakeholder collaboration by incorporating all your agency's unique requirements into a single digital solution with drag-and-drop functionality

Seamless e-signature

Obtain signatures electronically and generate digital documents by integrating with popular third-party services such as DocuSign

Real-time analytics

In-product dashboards gives agency stakeholders full visibility into their high-level KPIs, process bottlenecks, and more

Automated reporting

Ad hoc and automated report generation eliminates manual and error-prone report creation

End-to-end training management

From onboarding to an annual basis, confirm and monitor that your agency's employees have received all federally required training

About Unqork

Unqork is the first and only cloud-based no-code application development platform truly built for the enterprise. As a Software as a Service, Unqork is currently designated as "In Process" on the FedRAMP marketplace at the Moderate level.
